240 ml Treats 30,000 sq. ft.

**NEW SEEDINGS**

12-12-12-12ca  
One Bag Treats 5,000 sq. ft.

# LAWN SEED

## SUPER EASY TURF IV

This mixture has the base of two excellent turf type fall fescues - Brandy and Finelawn Petite. Super Easy Turf 4 also adds 15% Imagine Turf Type Perennial Ryegrass, a very durable ryegrass and dark green in color with 5% Raven Bluegrass, also dark green in color and sod forming. The ryegrass and bluegrass's spreading ability fill in the space sometimes left from the bunch grass fescues. Super Easy Turf 4 will make a beautiful, but durable yard, athletic field or commercial site.  
Seed 8-10 lbs. per 1000 sq ft. for a nice thick uniform stand.

## 5 - WAY FESCUE BLEND

Five turf type tall fescues blended together. These turf type fescues are very compatible with one another. All have a rich, dark green color and still have a high heat and drought tolerance. An excellent choice for sun or shade and poor soils. With 5 varieties, if one is susceptible to disease or injury in a given year, the others should compensate to keep your yard looking good. 5 Way Blend is a good choice for yards, businesses, athletic fields and high traffic areas. 5 Way - like all turf type fescues - need to be seeded at 8-10 lbs. per 1,000 sq. ft.

## TUFF TURF FESCUE

The turf type fescue alternative when you want a nice yard, requiring low maintenance with high durability... but don't want to pay higher prices for proprietary name varieties. TUFF-TURF is a private brand, distributed exclusively by Missouri Seed. TUFF-TURF is producing repeated planting successes in both home and commercial settings, demonstrating the quality acceptance of this turf fescue. Remember - for quality and economy - it's TUFF-TURF Brand.

*We also have a host of other varieties in stock.*
