**Field Description:** CORN MARKET DEVELOPMENT TRIALS

**Assumed Selling Price per unit:** \$ 5.00/BU

**Assumed Drying Cost:** \$ 0.06/Point Moisture Over 15%

Yield values are adjusted to 15% moisture

Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

## DEKALB CORN LEGEND

### VALUE ADDED TRAITS:

<b>RR2</b> = Roundup Ready® Corn 2	<b>YGRW</b> = YieldGard® Rootworm	<b>YGPL</b> = YieldGard® Plus
<b>RR2/YGPL</b> = YieldGard® Plus with Roundup Ready® Corn 2	<b>RR2/YGRW</b> = YieldGard® Rootworm with Roundup Ready® Corn 2	<b>YGCB</b> = YieldGard® Corn Borer
<b>RR2/YGCB</b> = YieldGard® Corn Borer with Roundup Ready® Corn 2	<b>WX</b> = Waxy Corn	<b>IMI</b> ® = Tolerant to imidazolinone (IMI) herbicides
<b>CONV</b> = Conventional		

**GENERAL:** N/A = Not Available

### Always Read and Follow Label Directions for All Products

The agronomic ratings stated in the product agronomic charts were developed from Asgrow's and DEKALB's internally conducted trials, which utilize commonly accepted methodology. These ratings can be used for comparative purposes between established and newly released products. They may not reflect total comparative performance. Actual performance may vary based on a number of factors, including without limiting the prevalence of the disease-causing organism or insect pest and environmental conditions. Product choice should be based on all performance information and not on pest reaction alone.

**IMPORTANT:** The following information is current as of April 17, 2007: YieldGard Plus, YieldGard Rootworm with Roundup Ready Corn 2 and YieldGard Corn Borer with Roundup Ready Corn 2 are grandfathered for import and use in processed feed in the E.U. YieldGard Plus with Roundup Ready Corn 2, YieldGard VT Rootworm/RR2 and YieldGard VT Triple are neither approved nor grandfathered and there is zero tolerance for these traits in processed feed imported in the E.U. Growers of all products bearing the Market Choices mark must talk to their grain handler to confirm the handler's buying position for grain from these products. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted.

Before opening a bag of seed, be sure to read and understand the stewardship requirements, **including applicable refuge requirements for insect resistance management**, for the biotechnology traits expressed in the seed as set forth in the Monsanto Technology Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with those stewardship requirements.

Grain harvested from products that bear this mark is fully approved for food and feed use in the United States and Japan, but is not approved in the European Union. You must find a market for this crop that will not ship this grain or its processed products to Europe. Appropriate markets for this grain include: domestic feed use or grain handlers that specifically agree to accept this grain and handle it appropriately. For more information on your grain market options, go to the American Seed Trade Association's website at [www.amseed.org](http://www.amseed.org) or call your seed supplier.
