Mother's Day is May 12th! We have tons of gift ideas throughout the store!

SPRING IS IN THE AIR!

M&M's Fertilizer Plant

By now everyone has heard about the terrible disaster in West, Texas where a huge explosion from a fertilizer plant caused multiple fatalities and millions of dollars in property damage. Our prayers are with the community of West as they begin the healing process.

Several questions have surfaced about M&M's fertilizer plant in Franklin. Could the same thing happen that occurred in West? What ingredients are stored in the Franklin Plant? Are we safe in the Franklin Community?

The two fertilizer ingredients that probably caused the blast in West are **Ammonia Nitrate** and **Anhydrous Ammonia**. Neither is stored at the M&M plant in Franklin. They are not used in the manufacturing process at M&M!

Franklin Fire Department: Also, we have met with the Franklin Volunteer Fire Department for training and have a

contingency plan in case of a fire. We feel very good about the safety of our plant and look forward to serving the community for many years!

Garden Center Highlight: Drift Roses...

Drift Roses are a great addition to any sunny spot! With an average size of 1-2' tall and 2-3' spread they work great as a border planting, in small gardens or just about anywhere. They have excellent disease resistance and bloom Spring-Frost. We have them available in Red, Pink, Peach & Coral.
